Comment period extended for proposed rule on changes-being-effected supplements

Contributed by **Morrison & Foerster LLP**

January 16 2014

The Food and Drug Administration has extended until March 13 2014 the comment period for Supplemental Applications Proposing Labelling Changes for Approved Drugs and Biological Products, its proposed rule which would allow generic manufacturers to strengthen warnings using 'changes being effected' supplements. Both generic and brand-name pharmaceutical manufacturers should consider submitting comments during this extended period.

For further details on the proposed rule and its impact on pharmaceutical manufacturers, please see "[Goodbye to generic preemption? FDA publishes proposed rule](#)".
